Recent Computer Science graduate with well-established military leadership, management, and mentoring experience, seeking to leverage analytical, technical, and programming skills to bring value and make a deep positive impact as a software engineer.

Work Experience

United States Coast Guard

April 2002 to Present

- Advanced to the highest enlisted rank, Master Chief Petty Officer (E-9), 8 years ahead of professional growth point; earned #1 score on service-wide examination at 3 different pay grades (2013, 2016, 2019)
- Earned highest possible Boat Forces certification as Surfman (2007) and assigned #392 in the Surf Register. Held numerous other boat forces and law enforcement certifications.
- Led one of only nineteen surf stations in the U.S. as Officer in Charge (2018-2022), capable of operating in extreme weather conditions including storm force winds and 30-ft seas.
- Supervised staff of 40 active duty and auxiliary personnel, in the execution of over 350 high-risk search and rescue and law enforcement missions annually; saved ~75 lives and preserved ~\$1.25M maritime property annually
- Aligned unit with strategic service goals and inspired team to achieve; led to 25% increase in operations, 75% increase in fisheries enforcement, and highest enforcement violation rate (22%) in New England
- Represented boat stations on selective national advisory council (2018-2021); influenced service-wide policy reforms which improved workforce management and reduced operational risk
- Collaborated with global construction company to develop safety policy/procedures for over-the-water construction staff (2017); developed and implemented PPE/MISHAP response plan and tested plan with joint agency drills
- Trained/certified Federal, State, and Local partner agencies in maritime operations; resulted in 3x increase in operational capabilities in area of responsibility
- Directed maintenance of \$25 million in real property assets and \$5 million in small boat assets
- Designed/implemented training, professional development, indoctrination, and education programs for 80 active duty, reserve, and auxiliary personnel (2013-2017); increased unit qualifications by 40% and developed unit-wide expertise in electronic navigation systems, search and rescue, law enforcement, and operational risk management. Certified personnel in boat forces and law enforcement competencies.
- Championed Leadership and Diversity Advisory Council (Chair) (2013-2017); held widely attended, monthly leadership workshops; crafted inclusive culture

Software Projects

BigCalculator - github.com/big-calculator (Project Manager/Design Lead, Software Engineering course project 2021)

- Led three-member, remote team to develop Windows calculator application capable of calculations with up to 100-digit precision
- Coordinated the development of documentation (Project Plan, Programmer's Manual, and User Guide)
- Designed and implemented app using model-view-presenter architecture
- Technologies Used: Java, JUnit, MVP Architecture, Git/GitHub, UML, Google Drive, Discord

Appointment Queue App (NoSQL course project, 2021)

- Developed web-based queueing application to facilitate socially distanced appointments during global pandemic
- Technologies Used: Vue.js, Node.js, Express, Google Firebase, MVC architecture

Minesweeper (personal project, 2020)

- Developed Minesweeper clone using Java/JavaFX
- Technologies Used: Java/JavaFX, Git/GitHub

Certifications

- **AWS Certified Cloud Practitioner**, Amazon Web Services Jan 2022

Education

- **M.S. Computer Science**, University of Illinois - Springfield Dec 2021
- **B.S. Environmental Science**, American Military University Feb 2018

Languages and Technologies

- Languages: Java, Python, SQL, C, JavaScript, HTML, CSS
- Technologies: Amazon Web Services, Spring Framework, Hibernate, NoSQL, Git/GitHub, Eclipse, VS Code, Vim
- Other: Cloud Computing, Machine Learning, Data Mining, Data Structures & Algorithms
